

EXPT NO:7B	DATA VISUALIZATION USING TABLEAU

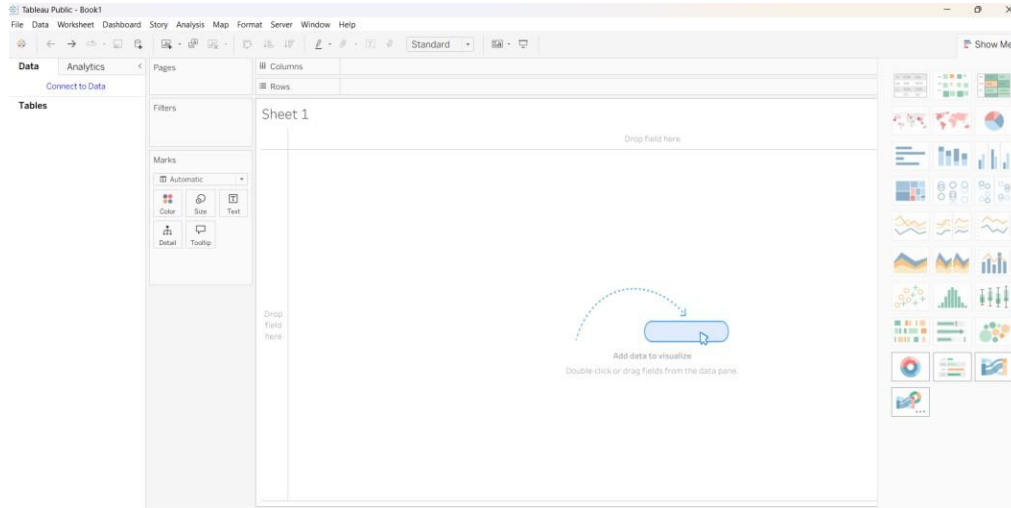

AIM:

To import, transform, analyze, and visualize data using Tableau Desktop and create interactive dashboards and reports for decision-making.

ALGORITHM:

1. Start
2. Open Tableau Desktop.
3. Connect to the required dataset.
4. Import and check the data.
5. Clean and transform the data if required.
6. Create worksheets using suitable fields.
7. Create visualizations such as bar charts, line charts, pie charts, and tables.
8. Combine the worksheets to create an interactive dashboard.
9. Add filters and slicers for better analysis.
10. Analyze the dashboard and identify important insights.
11. Stop.

OUTPUT:

Imported dataset displayed in Data View:

Tableau Public - Book1
